

ANGEL SHILUVA MAVUYANGWA

Aspiring Data Scientist

Johannesburg, South Africa | Johannesburg, South Africa | +27 78 789 7918 | angelshiluvu2004@gmail.com

| [LinkedIn](#) | [Github](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Aspiring Data Science and Information Technology student with hands-on experience in machine learning, predictive analytics, and AI-powered application development. Proficient in Python, SQL, and modern machine learning frameworks, with practical experience building forecasting models, data-driven applications, and intelligent systems. Skilled in data analysis, feature engineering, and transforming complex datasets into actionable business insights. IBM Z Global Datathon 2024 participant and passionate about leveraging data and AI to solve real-world business challenges

EDUCATION

Diploma in Information Technology

Vaal University of Technology | February 2024 – November 2026 (Expected)

Academic Distinctions: Development Software – 86% | System Software – 80% | Programming Logic – 76% | Business Analysis – 76%

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS, Java

AI / ML: Scikit-learn, TensorFlow, Keras, Regression Models, Classification Models, Deep Learning, Computer Vision

Data Science: Data Analysis, Statistical Analysis, Machine Learning, Predictive Analytics, Visualization, Feature Engineering, Time-Series Forecasting

Databases: SQL · Data Management & Analysis

Dev Tools: Git, GitHub, Jupyter Notebook

Cloud: Azure fundamentals

Soft Skills: Analytical Thinking, Problem-Solving, Initiative, Data Storytelling, Team Collaboration, Agile/Scrum

PROJECTS

Stock Price Forecasting Model | **Tech:** Python, Scikit-learn, TensorFlow/Keras, Pandas, NumPy, Matplotlib

- Developed a machine learning pipeline to forecast stock price trends using historical financial data.
- Applied feature engineering, EDA, and model evaluation techniques using ARIMA and Linear Regression.
- Visualised forecasting insights using Python-based analytical dashboards.

Face Recognition Application | **Tech:** Python, OpenCV, Deep Learning, Face Recognition libraries

- Built a real-time facial recognition system using computer vision and deep learning techniques.
- Improved recognition accuracy through image processing optimisation and threshold tuning.
- Implemented identity verification workflows using OpenCV and facial embeddings.

IBM Z Global Datathon 2024

- Selected to participate in an international Datathon focused on solving real-world business challenges using enterprise-scale datasets.
- Applied analytical and problem-solving skills in a competitive, team-based environment.

CERTIFICATIONS AND ACHIEVEMENTS

- IBM Z Datathon 2024 Participant — recognised for contribution to a global Datathon event hosted by IBM).
- Consistent academic distinction performer multiple Pass with Distinction results across two years of study at VUT.
