Professional summary

Aspiring Business Analyst with a strong foundation in business analysis, data analytics, and information systems. Skilled in requirements gathering, stakeholder communication, process mapping, dashboard development, and data visualization using Python, SQL, Power BI, and Excel. Experienced in translating business needs into analytical solutions, identifying opportunities for process improvement, and delivering insights that support informed decision-making and business growth.

Core competencies

- Requirements Gathering & Analysis
- Stakeholder Management & Communication
- Business Process Mapping & Improvement
- Data Analysis & Business Intelligence
- SQL, Power BI & Dashboard Development

Technical skills

Analytical Tools: Python (Pandas, NumPy), Power BI, Microsoft Excel, Tableau, Data cleaning, Dashboard Design

Languages: Python, SQL

Technologies / Frameworks: Scikit-learn, OpenCV, Git / GitHub, HTML / CSS / JavaScript, Agile / Scrum

Soft Skills: Business Requirements Analysis, Stakeholder Communication, Report Writing, SWOT & Gap Analysis, Process Mapping

Education

Diploma in Information Technology

Vaal University of Technology | February 2024 – November 2026 (Expected)

Projects Experience

Stock Price Trend Forecasting System | Python, Pandas, Scikit-learn, Matplotlib

- Built an end-to-end ML pipeline using historical equity data, engineered features, and applied regression models for short-term price forecasting.
- Created interactive dashboards with candlestick and trend visualisations for easy market interpretation.
- Improved accuracy using feature selection, cross-validation, and RMSE/MAE evaluation, and documented the full process.

E-Commerce Sales Analytics Platform | Python, SQL, Power BI, Excel 2025

- Analysed 50,000+ sales transactions to identify revenue trends, customer behaviour, and product performance.
- Developed executive Power BI dashboards with interactive KPI tracking and drill-down reporting.
- Applied customer segmentation and RFM analysis to generate data-driven business recommendations.

Achievements

- Distinctions in Business Analysis, Development Software, and Information Systems.
- Demonstrated ability to translate complex data into strategic business recommendations.
